

Project Testing

Test Case 1 – Critical Priority

Action: Select Priority = Critical

Expected Result:

Description becomes mandatory.

Required fields are highlighted.

Result: Passed.

Test Case 2 – Normal Priority

Action: Select a priority other than Critical.

Expected Result:

Description is not mandatory based on the configured condition.

Result: Passed.

Test Case 3 – Software Category

Action: Select Category = Software.

Expected Result:

Configured software-related field becomes visible/mandatory.

Result: Passed.

Test Case 4 – Other Category

Action: Select a category other than Software.

Expected Result:

Configured software-related field follows the alternate UI Policy behaviour.

Result: Passed.

Test Case 5 – Client Script Execution

Action: Change the configured Incident field.

Expected Result:

Client Script executes dynamically without refreshing the page.

Result: Passed.

Test Case 6 – UI Policy Execution

Action: Change the Incident field to satisfy the UI Policy condition.

Expected Result:

Configured fields dynamically change their mandatory, visible, or read-only state.

Result: Passed.
