

Project Documentation

Project Title

Implement Client Script & UI Policy – Incident

Technology Used

- ServiceNow
- Incident Management
- Client Script
- UI Policy
- UI Policy Action
- JavaScript

Project Objective

The objective of this project is to implement dynamic behavior on the ServiceNow Incident form using Client Scripts and UI Policies.

Key Features

- Dynamic field control
- Conditional mandatory fields
- Conditional visibility
- Read-only field control
- Client-side JavaScript
- Incident form customization
- Improved data-entry consistency

Client Script

Client Scripts are used to execute JavaScript on the client side and dynamically control the Incident form.

UI Policy

UI Policies are used to dynamically control field properties such as:

- Mandatory
- Visible
- Read-only

Project Outcome

The project successfully demonstrates how **Client Scripts and UI Policies** can be used together to create a dynamic and user-friendly Incident form in ServiceNow.
